Comment:

a. The information on the occupation of ST. VALENTIN, NEUSIEDL A SEE and KITZSEE as of early August 1949 does not indicate any change, if compared with previous reports.

b. Two hundred to three hundred engineer troops (possibly component units of the 177th Engr Bn/95th Gds Wtz Rifle Div) had been located in BLIK on the Danube River up to late July 1949. Their departure (probably for the DOELMESHEIM troop training grounds) was observed at that time. The observation of 11 August 1949 indicates that recruits probably remained at the post.

c. Most of the troops of the unit stationed in BAD RISCRAU left for maneuvers in mid-June 1949.

d. The small guard detail in RAINBURG (referred to as rear detail in May 1949) was confirmed.
